This membership places Ulster county among the largest Farm Bureaus in the state and the largest Farm Bureau in the Hudson Valley.

The membership was obtained entirely by the committeemen of the Farm Bureau and the Chamber of Commerce and it surely answers the question of whether or not the farmers of Ulster county want the Farm Bureau.

The exceptionally large membership in the City of Kingston was obtained by the agricultural relations committee of the Chamber of Commerce and shows a long striving toward cooperation between the realized business men of the city and the also farmers of the county.

**WIND DID DAMAGE.**

To Farms and Buildings in Town of Rosendale.

A heavy wind and rain storm that struck the town of Rosendale Wednesday afternoon between 3 and 5 o'clock did considerable damage on the farm of supervisor S. H. Auchmoody. Barns and out buildings were levelled and trees were torn up by the roots. The damage done is estimated at \$5,000. Fortunately the cattle and horses were in buildings that withstood the heavy gale, and were not injured. It is thought that much damage was done on other farms in the vicinity.

# NEW LEAGUE SIGNERS QUIT

Over member of the Dairyman's League who signed the new cooperative contract, providing for the pooling of proceeds and the sale of his milk, was given in that contract from the 15th to the 25th of February to the 15th and withdrew from the Cooperative Association. The cancellation of the contract was just past, and out of the 42,000 signers of the contract only 352 exceeded their privilege of withdrawing and many of those who did withdraw did so for the perfect and legitimate reason that they were going out of the dairy business. Therefore, in spite of all the money that has been spent and the propaganda written and spread throughout the Dairyman's League territory to cause in the farmers' minds a distrust of the cooperative association and of the contract only 2 per cent withdrew their names.

What is of still greater interest in showing the spirit of the farmers toward cooperation is the fact that out of the 2,000 patrons of the cooperative plants which have been operated by the cooperative association for several months under the cooperative contract and with pooling of proceeds, only 150 have been recalled. In previous years, the proof of the pudding is in the eating. The men who have worked under the cooperative contract during the past eight or nine months, about the worst period for the marketing of milk for the past ten years, were well enough pleased with the work of their own association to stick to it.

Many Claim Columbus as Native.

Italy, Spain, possibly Portugal, and now Corsica (and therefore France) claim Christopher Columbus as their own. An increasing number of historians and scholars in Galicia believe that he was a Galician. The origin of the belief was that one of his ships was called La Galega (the Galician) and sailed from Pontevedra.

## The Story of Our States

By JONATHAN BRACE

### II.—PENNSYLVANIA

THE second state to adopt the Constitution was Pennsylvania. Its area of 45,126 square miles is larger than the combined New England states, except Maine, and New Jersey thrown in for good measure. Its name means "Penn's Woodland" and was so named by King Charles II, who granted this territory to the Quakers, William Penn, and named it in commemoration of Penn's father, who had been a distinguished admiral and on terms of peculiar friendship and intimacy with the royal family. This grant was made in lieu of £15,000, which the king owed Admiral Penn. On this basis it originally cost about \$2 a square mile.

Pennsylvania has assumed such an important place among the states that it is often called the Keystone State. This term was originally derived originally because her name was carved on the keystone of the bridge over Rock creek, between Washington and Georgetown. Later on it was applied on account of the great importance of the state in national elections. Its designation to congress totals 28, second only in size to that from New York, and Pennsylvania accordingly has 28 presidential electors.

William Penn first came over to America in 1682. The following year he laid out the city of Philadelphia, or "Brotherly Love," which was named after a biblical city in Asia Minor. As Pennsylvania was the only colony without a capital, Penn obtained from the Duke of York the control of Delaware, and so all the Revolution state two provinces were under the same proprietary government. Quarrels with Maryland over boundary caused a formal survey to be made by the surveyors, Mason and Dixon, and it was this which became famous during the Civil war as the Mason and Dixon line, the dividing mark between the slave and the free states.

By the Revolution the province was divided into three counties.

## VERDICT OF \$2,000 FOR W. F. HAM

Who Was Hurt When His Car Was Struck By That of Joseph Hallenborg on Stony Hollow Road.

Wednesday afternoon in supreme court an inquest was taken in the case of William F. Ham against Joseph Hallenborg, an action brought by Mr. Ham to recover for personal injuries received in an automobile accident on July 5, 1920, on the Stony Hollow road just south of the Ulster & Delaware railroad viaduct. Mr. Ham at the time of the accident was riding in a Ford car being driven by Eugene Niles of this city. While making the turn near Stony Hollow, the car of defendant ran into the Niles car, damaging it and severely injuring Mr. Ham. He received cuts about the face and body, an injured leg and his nose was broken. He was taken to the Kingston City Hospital and treated by Dr. Stern but it was three weeks before he was able to resume work. The action was brought to recover for loss of time, doctor's bills and for damages sustained to the amount of \$2,000. Since the accident he has been constantly treated for trouble with his nose.

After being out a short time the jury returned a verdict for the full amount sued for, \$2,000. Judge William D. Brinnier, Jr., appeared for Mr. Ham. There was no appearance on part of defendant.

## "GAS" DROPS; MAY HIT 20 CENTS

Another cut in the price of gasoline went into effect Wednesday when the Standard Oil Company reduced the wholesale price of gas one cent a gallon, bringing the price down to twenty-eight cents wholesale. The dealers handling Texaco gasoline were notified at the same time of a two cent reduction bringing the price down to twenty-seven cents a gallon wholesale. This reduction in the wholesale price has been handed along to the consumer and Texaco signs about town will read 31 cents.

One dealer who has been selling gas for 31 cents for some time will make a further reduction.

One of the big dealers in gasoline and motor car supplies is predicting 20 cent gas before the end of the summer and should gas reach the 20-cent mark it will stimulate the automobile business considerably and cause people who now own cars to be a bit more liberal in their use than when gas was selling around the 35 cent price.

She couldn't believe her eyes, for she had met him in the Argonne under fire, a romantic girl and a big brave Yankee captain, met and loved and secretly married, but when the glamour had faded, and her hero appeared in her exquisite home in a loud hand-me-down suit, she didn't rush to lay her head on his rainbow necktie. So Sam McGinnis opened a new attack, he became her father's butler, humbled her, madened her, trained her, until well, it won't do to spoil the rest. A Christy comedy, "A Fresh Start" is also featured.

The Auditorium tonight offers Eddie Polo, the great acrobat, in "The King of the Circus," also Tom Moore, in "Officer 565." Tomorrow Mildred Harris in "Old Dad" the story that thrilled millions of readers in The Woman's Home Companion.

### Back To Pre-War Prices.

The Columbia Graphophone Company has announced a radical readjustment in the prices of Columbia Gramophones. This is the first price-cutting move since the present trend of prices, and many promise similar action on the part of other companies. This readjustment is even more sweeping than appears at first sight. It has cut the average price of Columbia Gramophones below the pre-war level, and these prices are for models with all the latest improvements.

## NO FINE THEORIES AT FARM SCHOOL

practical, not book-learning, to be emphasized in sessions of Accord, says Farm Bureau Agent.

While they call it an extension school, no one should get the idea that the sessions to be held at Accord from March 17 to March 19, inclusive, will deal mainly with fine theories which may and may not work, says Farm Bureau Agent E. L. Chase, who has arranged with the State College of Agriculture for the holding of the school. The emphasis most decidedly will be placed on the practical side of extension, he gives assurance, and says the instructors whom the college will send are men who have had actual farm experience as well as technical training. They are C. A. Boutelle and R. G. Wiggins.

The Farm Bureau Association of this county is strongly back of the school and Mr. Chase believes that all farmers of the section will find the sessions well worth attending. He will be very glad to give those interested further information if they will call on him at his office in Kingston or will telephone him.

C. A. Boutelle, who will be one of the instructors in the school, for six years was superintendent of the Empire City Farms at Cuba, N. Y., consisting of 4,000 acres and owned by the prominent Jersey cattle and horse breeder, William Simpson. He has also been manager of an Al-

bama plantation, of the Mohagan Farm at Wadesboro, N. Y., and of Rockwood Farm at Mohawk, N. Y. Mr. Boutelle was born on a dairy and fruit farm at Loomis, and attended the Massachusetts Agricultural College. He has been engaged in extension work in the New York State College at Ithaca since 1915.

R. G. Wiggins, the other instructor in the school, also can qualify as a real farmer. He was born in northern Missouri and was graduated from a village high school. While on the home farm, he was particularly interested in corn production. He was graduated from Missouri University in 1914 with honors. Conquer False With True.

The only way to conquer a false idea is to set up against it a true one. The world, while willing to take what it gets, is ever searching for something better. Constructive criticism has built the structure of today on the mistakes of yesterday.

CLEAN UP DAYS  
ON CITY STREETS

A Miniature Cloud Burst Broke Over City Wednesday Afternoon Causing Some Damage To The Streets—Five Sewers Cleaned Out In Time.

Five city sewers that had become blocked up were opened and repaired in time to avoid considerable trouble when a miniature cloud-burst broke over Kingston on Wednesday afternoon causing damage to the city streets. The rainfall was the heaviest while it lasted this season and holes were reported to the board of public works in many of the streets which are now being repaired by the street department.

The five sewers that were blocked up were located in various sections of the city. The one on Jaenen avenue, near Forthall avenue, caused members of the department to work all Sunday night locating the trouble. The manhole leading to the sewer was hidden from view under three feet of earth, and considerable delay was caused in locating it.

Another had break was in the Jacobs Valley sewer where four lengths of the big pipe had broken. Another was on Canal street, and one on Abbot street, near the South Rondout ferry. There was also a blocked sewer on Wall street, near Pearl street. Fortunately all five sewers were repaired before the heavy downpour of rain Wednesday.

With the snow practically all off the city streets the street department is busy gathering up the accumulation of winter's refuse and carting it away. These are clean up days on the city streets, and many householders are also joining in the movement by cleaning up back yards now that the snow piles have practically disappeared.

## FEAR EPIDEMIC OF TYPHUS

British Authority Tells of Danger to the World Because of Bad Conditions in Russia.

Dr. L. Haden Guest of London, who has been investigating conditions in Russia, reports to the Lancet (London) that the whole of that country has been swept by typhus and relapsing fever, and that all indications point unmistakably to a formidable epidemic in the coming winter. Cholera also has made its appearance and smallpox is widely prevalent.

The Lancet warns the world at large that unless immediate and effective steps be taken these frightful diseases will spread through the border states to other countries, and before long will appear all over the world. "The council of the League of Nations has thoroughly studied the situation, with the aid of some of the best-known epidemiologists in the world; they have a reasonable and economical program, and have appointed

of commissioners, but the actual work cannot proceed until they have obtained money guarantees from the different nations, which so far have not materialized, except in the case of a few countries, including Great Britain and Canada. The future of the matter may well prove, in the parlance of the day, an "acid test" of the reality of the league as a family of nations, ready to act for the common good and to protect members of the family who are threatened by disaster."

Modern Love Practical.  
"Harry," exclaimed the blushing maiden, "this declaration of love is so sudden that I hardly know what to say. I was unprepared for it. It unnerves me."

"I was afraid it might," said the young chemist, rising with alacrity from his knees, "and I brought with me a bottle of my patented nerve tonic. This preparation, my darling, he added, smilingly, as he took the bottle from his pocket, quickly extracted

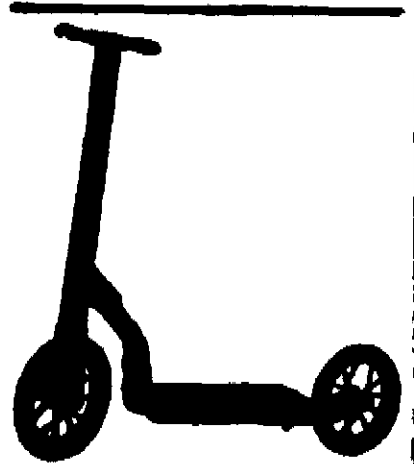

the cork and poured a quantity of the medicine into a spoon he had brought with him, "will allow you to dine peacefully, quiet the nerves, digestion and restore lost appetite, and it at 50 cents a bottle. This is done for an adult. Take it, dear!"

"Planting Fat" From Holland.  
A company has been organized in The Hague for the purpose of sending a "floating fair" as it is called, to practically a ship loaded with various products and commercial goods to sell them, to various parts of the world, particularly the United States. The concern is organized somewhat on a co-operative basis and proposes to send the Messagerie Maritime vessel, the Macaranda, of 6,100 tons to the United States and Canada and South America for the purpose of introducing Netherlands products and building Netherlands commercial houses to establish import and export connections in the countries visited.
